

# Emerging Proposal for O&C Logging Mandates

Western OR BLM public lands = 2.5 million acres  
Western OR BLM public lands proposed for long term logging = 900,000 acres

This map assumes only stands under 80 years old would be in the mandated logging plan. Increasing the age break would significantly increase the number of acres. Forest stand ages are based on BLM GIS data. This map is Oregon Wild's interpretation of DeFazio's proposal and should be considered approximated. The BLM Coos Bay Wagon Road lands are included in this analysis, though it's not know if they will be included in the final proposal.

-  Public lands proposed for long term logging mandates
-  BLM public lands not proposed for logging mandates
